I would say the best part about this book is the photographs. They do make the food look enticing. But, I think that the ingredient combinations are unrealistic for a not too picky child. (Let alone if yours would be considered picky.) Of course, you can adjust the ingredients to the child, but you might then be left with a weird or bland combination. Also, it ultimately cuts down on the number of items that you can actually use from the book. Some of the "picky" substitutions seem to be more on the picky no-no list than the thing they are replacing (lettuce) (e.g., a salad made with oranges, celery and white vinegar). I wonder if the author was working from her own children's "off limits" list.

For instance, tomatoes, cucumber, mayonnaise, mustard are used frequently. These are more off limits in my house than lettuce. Also, the author suggests combinations that look yummy when prepared, but may not stand up to the rigors of a lunchbox. For instance, sliced bananas and sliced apples. She doesn't address the extra preparation that might be involved (i.e., for apples) to make the cool open face sandwich not look nasty by noon. And, I am not even sure there is anything you can do for sliced bananas to keep them fresh. I wonder if she tested the recipes to see if they would be appealing 4-5 hours later. All in all, it amounts to a cookbook that I won't be able to use much from. I was looking for something that would have mostly kid staples with a little bit that pushes the envelope to make me say "Aha! I hadn't thought of that before." But, mostly, I found myself saying, "That looks good for my lunch, but S wouldn't eat it."
