There's something for everyone in here! If you're a lover of Mexican food, you'll find dozens of simple, delicious, and authentic recipes. "Mom's White Enchiladas" is already an all-time favorite of mine. If you're looking for Mexican-influenced dishes with a extra twist, you'll find all kinds of wonderfully inventive hybrids, like the "Tex-Mex Meat Loaf" or the "Southwest Lasagna". And if you're looking for something completely different to do with tortillas, stepping out of the Mexican territory, you'll find the most creative (and tasty) ideas for snacks, appetizers, even desserts - you name it, they've got it. It even includes kid-friendly fare, and it's quite vegetarian-friendly as well. This is also, by far, one of the most practical cookbooks I've ever used. From the Helpful Hints at the very beginning, to the clear and concise directions throughout all the recipes - even the spiral binding (hey, it makes a big difference, being able to lay it flat) and plastic cover; they all add up to make this an easy and essential addition to your cookbook shelf.

i am gluten intolerant, so i cannot use "normal" bread, and gluten-free bread is expensive. so from

the beginning i decided to replace bread with corn tortillas.i have just received this cookbook today, and i already love it! i am so excited to try out the "strawberry margarita squares"! this cookbook is exactly what i wanted--a cookbook that contains recipes which are easy to convert to gluten free (corn tortilla instead of flour tortilla, for the most part) easy to do, and gives good alternatives to gluten-laden foods that i miss.and it's spiral-bound!to address some complaints others had (ahem): true, these recipes are not authentic mexican--they are tex-mex at best--but see this: the title is "101 things to do with a tortilla" not "101 authentic mexican recipes to make with a tortilla". and about the fact that this cookbook does not include a recipe for tortillas....how many people do you know that make their own tortillas? a quick search on Bing will bring many results, and on every corn masa package is a recipe for corn tortillas.i recommend this cookbook to any and everyone, most of all to celiacs and gluten-intolerants that want to replace bread.

As an ocean going chef the "101" cookbook series is the chef/cook's best friend. I found a collection of these very handy cookbooks on my last ship and I knew I had to have my own copies. The ship was short handed and it ran out of basic cooking & baking supplies. These cookbooks gave excellent and simple meal preperation ideas with the few supplies & staff we did have. It's all common sense but these ladies take the brain damage out of meal planning. Most importantly, the crew was always satisfied. I'd recommend the series for the beginning cook or one that is short on time.

Awesome book for the price, if you like tortila shells. There are several catagories of recipes of which to choose. Most ingredients are things normally kept on hand. Have made several recipes and haven't been disappoint.

I'm a type 2 diabetic and it's must easier to find low carb tortillas that taste good and are a good price. Usually low carb bread is "spongey" and it isn't very tasty or it's super expensive or both.I buy Mama Lupe's low carb tortillas and with all the recipes in this book I never get tired of these. Since I got this book I've had more tortillas and my A1C went down by 2 points at my last recheck.I would definitely recommend this book. The recipes are easy and most of them have easily found ingredients, they taste good and they are pretty easy to make and one last thing, some of the fillings can be made ahead and frozen to save even more time.I think I've tried about 10-12 of the recipes so far and some of my favorites are:Chili Cheese Breakfast Burrito (I use home made chili but you could easily use ready to eat)Southwest PizzasChicken Roll Ups (uses chiles and cream of chicken

soup but it's also good if you use fiesta nacho cheese soup and if you like things more spicy, add a little pepper jack cheese)Great book. So glad I have it. Makes lunches and dinners not so diabetic boring.

I bought these cookbooks for a 14 year old young man that I am mentoring in the Big Brother program. Every young man needs to know how to cook before they leave their Mom's home. You can only eat at McDonald's so many times. Easy recipes with simple ingredients, with clear instruction on how to make each recipe

http://www..com/gp/product/1586854690/ref=oh_details_o00_s00_i00Prompt shipping! Item was received 3 days after order was placed! Item was as described. If I had had the chance to thumb through the cookbook in a store I would not have purchased it but for the price I am okay with purchase. Just not a lot of recipes that seem interesting enough to try. I also ordered Norpro Nonstick Tortilla Bowl Makers, Set of 2 (like those shown on TV) but from a different seller to make salads using tortilla shells so was hoping this cookbook would have different salad ideas to use w/ the tortilla bowl makers but was disappointed :(This is more for someone just starting out cooking that could benefit from the simple recipes offered in the cookbook.

Cheaply made recipe book filled with older type tortilla recipes. Definitely overpriced compared to other cookbooks I've purchased in past years. 101? Really?? My expectation was of complete disappointment.
