Customer Reviews

Love the book - started to devour it the second it arrived! The idea of superfood soups is amazing - I just got a pressure cooker so I will be putting together several of her soups to freeze for later for sure! Love the Broth section - her superfood broths look wonderful! I mean we all drink hot tea and coffee during the whole year so why not superfood broths right!?? Her approach will be another awesome layer of nutrition to my regiment of juicing, smoothies! The only drawback is the editing leaves something to be desired. Like on page 58 the same paragraph is repeated 3 times! You may want to have a word with your editor!

I'm a complete novice at making soup - or cooking in general. This was super easy to follow with delicious recipes even *I* can pull off. Before it gets to the recipe part, it even gives you a little diagram of how to "build" a good soup. That was enormously helpful. I would suggest this to anyone!

I confess. I'm a soup snob. Travelling a lot, I cringe at the number of menus touting their "homemade soup". I often wonder which employee was asked or coerced into making a batch of soup at home and bringing it in to the restaurant. And everyone's home must have the same tasting artificial flavours! Enter Julie's Superfood Soups, which I pre-ordered and the crew at (once again) beat their delivery estimate. Even if these soups weren't amazingly tasteful, the list of ingredients tells you that your body will benefit from the masterful selection of healthy ingredients. But they ARE amazingly tasteful and each one is very different because there are no standard flavourings. They are incredibly satisfying, too, and as one batch will cover two meals (for 2), I look forward to the replay with fresh enthusiasm, maybe even greater because of the recent experience. Superfood Soups, as with Julie's other excellent books, is much more than a book of recipes. It's an amalgam of Superfood Soup 101 right through your PhD. As we approach the autumn and winter, this book will be tattered and stained very quickly. But 100 recipes should get me to spring. Thanks, Julie.
